Accessible information is power, organized information is profitable.

PlacerOnline.biz is a web-based data management subscription service, using a ready to go software specifically designed for the aggregate and construction materials industry. Our cloud-computing, password protected, system will organize and coordinate your important documents, inspections and notifications from day one.

Imagine all your facilities' permits, maps, agreements and other business related documents, available at your fingertips at any time, from anywhere. Imagine feeling confident that your regulatory and legal documents are up to date, secure and available to everyone who needs them. PlacerOnline.biz is a cost effective, simple to use system to help accomplish all those things.

It will help you:

- Create a standardized system to manage operational data and information coming in and going out.
- Get organized with a centralized location for all your information which is accessible and secure, there when you need it.
- Develop a customized system of notifications and due dates to ensure each site has meet it's auditing and regulatory requirements.
- Track all of your site's time sensitive inspections and tasks.
- Make all your existing company documents available to all sites with a single upload, things like best management practices, reports, maps, test results or current training.
- Avoid costly inspection oversights and recordkeeping fines.

Stable and Secure: PlacerOnline.biz LLC has teamed with complianceGO, an expert in information technology, data storage and internet security, to ensure security and data backup is accomplished at the highest level.

Easy to Use and No IT Department Required: PlacerOnline.biz is a simple to use web-base system you can understand and implement with a few hours in-house training. PlacerOnline.biz also provides a full-time help desk to assist with troubleshooting, document organization and data conversion issues. With a central online login, the only thing your sites will need is an internet connection. You are not responsible for any IT management, no licenses to buy, no serial number to keep track of, no CDs to send from site to site, updates and notification are done automatically, at no additional cost.

Continental Placer Inc. and PlacerOnline.biz: After twenty-three years of consulting to the aggregate and construction material producers our professional saw a need for a central depository to properly collect, organize and store very important documents securely. A system which would notify and process regulatory information by site, making the information available instantly company-wide.
